

Ayushi Sain

Software Development Engineer | Full-Stack & API Development | ML-Skilled
Ghaziabad, Uttar Pradesh | +91 8384898652 | Ayushisain301@gmail.com | linkedin.com/in/ayushi-sain123
github.com/CodewithAyu01 | Portfolio

Summary

Computer Science graduate targeting Software Development Engineer roles, with internship experience in API development, cloud deployment, and full-stack application delivery, backed by applied Machine Learning skills (Scikit-learn, model deployment, statistical analysis). Comfortable across Flask/Node.js backends, RESTful API design, SQL/NoSQL databases, and React frontends, with measurable performance gains (15–25%) across five shipped projects and a published ML research paper.

Experience

AI/ML Intern

Emerging India Analytics

May 2026 – Present

Noida, India

- Built and deployed AI-powered full-stack applications (ResumeForge, ResumeElite) using Flask, Node.js, Firebase, Supabase, and MySQL, including JWT authentication, Google OAuth, and RBAC.
- Designed and integrated REST APIs with Supabase Auth, Firestore, and OpenRouter AI APIs for scalable backend services, plus AI-assisted content enhancement and browser-based voice input via the SpeechRecognition API.
- Conducted load and scalability testing with k6 and Locust, identifying bottlenecks and proposing caching, autoscaling, and queue-based processing strategies.
- Managed cloud deployment workflows on Netlify, Render, and GitHub, resolving production API routing and environment-configuration issues to improve release reliability.

Web and App Developer Intern

QMANSYS Infosolutions LLP

Jul 2025 – Oct 2025

Remote

- Designed an AI-based weather prediction system using REST APIs, improving data retrieval efficiency by 15% for 100+ active users.
- Reduced production bugs by 12% through systematic debugging, testing, and backend optimization.
- Led API development for scalable REST endpoints while contributing to sprint planning and code reviews in an agile team.

Projects

Wanderlust | **Full-Stack Travel Platform** – Node.js, Express, MongoDB, JWT [Live](#) | [GitHub](#)

- Built a full-stack listing platform with JWT authentication and RESTful CRUD APIs managing 50+ property listings; improved performance by 25% through optimized Cloudinary image handling.

Stock Trading Platform | **MERN Dashboard** – React, Node.js, Express, MongoDB [Live](#) | [GitHub](#)

- Engineered a secure trading dashboard with protected routes and custom Express middleware; improved frontend performance by 20% using React Hooks (useMemo, useCallback).

Crop Recommendation System | **ML Prediction App** – Python, Scikit-learn, Streamlit [Live](#) | [GitHub](#)

- Built an interactive Streamlit app predicting suitable crops from user inputs, achieving 98% prediction accuracy through feature engineering.

AI Resume Builder | **SaaS Platform** – React, Supabase, OpenRouter API

[Live](#)

- Built an AI-powered resume builder with dynamic templates, JWT/Google OAuth, and role-based dashboards for students, teachers, and admins. (*Codebase private – built under company IP.*)

Technical Skills

Languages: Java, Python, JavaScript, SQL

Frontend & Backend: React.js, Node.js, Express, Flask, REST APIs

Databases: MongoDB, MySQL, Firebase, Supabase

Tools & Platforms: Git, GitHub, Docker, Postman, Netlify, Render, k6, Locust

ML / Data: Pandas, NumPy, Scikit-learn, Statistical Analysis

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, System Design (Basics)

Education

Raj Kumar Goel Institute of Technology (RKGIT), Ghaziabad

Bachelor of Technology in Computer Science and Engineering

2022 – 2026

CGPA: 7.4

Certifications & Leadership

- Research Publication:** Published research paper on Machine Learning-Driven Congestion Control in Computer Networks
- Full Stack MERN Certification:** 200+ hours of applied training – React.js, Node.js, MongoDB, and deployment workflows
- Vice President, Nebula Club:** Led technical initiatives and mentorship for CSE-AIML students; organized “Hack the Prompt” and “Tech Expo 3.0”
- Robo Soccer Finalist:** Inter-college robotics competition, demonstrating teamwork and problem-solving abilities
